# TABLE OF CONTENTS

# INTRODUCTION

Our lives flow so fast. We consume everything without countlessly. Many things change everyday. While our enormous world will be enough for all, due to the injustices in income distribution, endless political conflicts and tensions and our surging greed, it becomes insufficient for hundreds of millions of people. Hunger, illness, poverty, immigration never end. Every year, the need for humanitarian aid increases further. Conscientious people around the world are trying to draw attention with these analyses and comments. Yeryüzü Doktorları, as a humanitarian practitioner initiative is trying to support the strengthening of this awareness with "Open your eyes!", "I am starving to death... Really!" etc. campaigns and at the same time, and most importantly, delivers such supports provided through these campaigns to the people in need. While increasing awareness, it binds up the wounds and becomes a remedy for the suffering. It proves that something may be done with concrete output. It becomes a hope for all humanity.

With reference to the values of our civilization, which sees to think of others more than itself as a task, we have been formed with excitement and came to these days. As years go by, we improve our way of executing our health oriented studies for humanitarian aid day by day. We are switching our main activity and support processes to a more professional and sustainable path. Surely there is more to be done and we will do it with the same belief. Unfortunately, humanitarian aid in the modern world is now being used as a power and advertising tool. At this point, Yeryüzü Doktorları pays attention to the exemption and privacy of the people in need; and try to enframe our donors, volunteers and employees with the correct locations and limits carefully in terms of corporate advertising and gains. Our effort is a necessity for keeping our mercy clean. We are heading to the future in the framework of national and international ethical principles.

Now, in the modern world, all the problems and pains are being responded with virtual clicks. The actual information communicated to people disappears between the virtual manipulations and social media's click counts and like buttons. We must make real touches to wounds. We will never be satisfied for giving our best in this way. We will continue working along with you, in order to do what must be done.

We would like to express our gratitude to our volunteers and donors who walked with us and supported us in this goodness movement which is one of the most precious duties of humankind and that this goodness has been blessed with your valuable contributions.

Towards a world where humankind wraps up each others wounds; with tenacity, persistence and hope,

Yahyahan GÜNEY, MD Chairman of the Board of Directors

# 2.1. MISSION, VISION, PRINCIPLES

### 2.1.1. Mission and vision

In 2000, Yeryüzü Doktorları began to work as an international humanitarian organization focused on the field of health and has carried out hundreds of projects in Afghanistan to Syria, Somalia to Palestine, Uganda to Yemen, in nearly 50 countries to date, with donors exceeding 100 thousand and volunteers exceeding 15 thousand. In the journey it began by organizing therapeutic short-term health camps, it is continuing to carry out a lot of projects and programs from preventative health to psychosocial support, from physical capacity development to health education. Working with the mission to support people unable to access health services, which is one of the most basic human rights cling on to life, Yeryüzü Doktorları is prioritizing capacity development and sustainable projects and programs with the vision of becoming the leader and competent NGO in the field of health.

**Mission:** To reach out to the people in need who are unable to access health services and make them hold on to life.

**Vision:** Leader and competent medical humanitarian aid organisation.

### 2.1.2. Principles

**Need-orientation:** In Yeryüzü Doktorları, the service to be provided is in the centre of decisions and applications. Without discriminating religion, language, race, gender, geography, the quality, quantity and sustainability of the service to be provided is observed.

**Competency:** Yeryüzü Doktorları execute the medical aid activities with efficient and productive processes. Provides quality service. In this context, it possesses the corporate competencies that is necessary and develops them continuously. It does not make an initiative on an area which requires special information, skill or competency which it does not possess.

**Respect for Humanitarian Values:** Yeryüzü Doktorları act with humanitarian values that form the essence of helping such as compassion, sincerity, humility, trust; respects the beliefs, cultures and traditions of different geographies and nations.

**Independence:** Yeryüzü Doktorları move in line with its mission, principles and plans it has announced to spread the good and the collaborations it has made to serve the beneficiaries better do not go beyond this framework.

**Transparency:** Yeryüzü Doktorları shows what is done with the resources entrusted to it transparently. Services are always executed in an accountable manner in administrative, financial and legal terms.

# 2.3. AREAS OF ACTIVITY

### 2.3.1. Crisis, Emergency Projects

Yeryüzü Doktorları provides emergency treatment services in case of earthquakes, floods, fires etc. disasters and in wars and crisis circumstances by deploying Voluntary Medical Teams; establishes field hospitals and clinics for the provision of such services; support the rehabilitation and operation of damaged hospitals and clinics; provides medication, material and equipment support.

### 2.3.2. Therapeutic Health Care Projects

Yeryüzü Doktorları organizes/supports medical camps with the organization of voluntary medical teams in all health branches towards patients that are unable to be treated with local facilities; establishes/rehabilitates clinics; provides necessary medication, material and equipment support.

### 2.3.3. Nutrition Health Projects

Yeryüzü Doktorları establishes nutrition health centres in regions where hunger issues frequently occur due to drought, poverty, internal disturbances and similar reasons / or supports the existing centres; identifies deficiencies on basic examination services provision and nutritional disorders in these centres and according to the assessments made, provides therapeutic nutritional supplements, organizes 3-6 months of nutritional programs and makes sure the necessary medication, consumables and equipment support is provided to the adults and children with the collaboration of United Nations International Children's Emergency Fund (UNICEF) and the World Food Program (WFP). In circumstances where therapeutic nutritional supplements are not provided, regular nutrition programs with normal foods are made, and nutritional support is provided with rations, Qurbani meat etc.

### 2.3.4. Maternal Health Projects

Yeryüzü Doktorları establishes maternal health clinics where birth facilities are limited and birth-related problems are observed and/or improves existing clinics; and by providing doctor, nurse, midwife, community health employee etc. employment/training and medication/equipment support, provides/supports birth and post-birth medical services and gives trainings on baby care and reproductive health to pregnant and nursing mothers.

### 2.3.5. Preventive Healthcare Projects

Yeryüzü Doktorları develops projects that will increase access to fresh water by implementing necessary improvements and controls in countries where it conducts projects and programs in order to protect health and prevent diseases, conducts circumcision operations and makes health checks.

### 2.3.6. Medical Training Projects

In the countries where Yeryüzü Doktorları implement Projects and Programs, it supports activities towards the development of humane capacity with education, certification and specialization programs at associate's degree, undergraduate and postgraduate levels in order to increase health employee capacity and contributes scientific research and activities by organizing congresses.

### 2.3.7. Psychosocial Support Projects

Yeryüzü Doktorları conducts informative and supportive activities for the local community and focus groups by conducting screenings and reviews for psychosocial support in trauma, disaster and crisis situations. It develops psychosocial support projects towards social needs by identifying the current state of the local mental health system; organizes trainings and studies for mental health volunteers who will take part in these projects. It provides psychosocial assistance to civil society employees and Voluntary Medical Teams who are involved in the field works.

# 2.3.8. Medication, Consumables and Hygiene Material Support Projects

Yeryüzü Doktorları, especially in crisis and emergencies, provides medication, consumable and hygiene material aid in order to support therapeutic health services in the countries/regions in need.

### 2.3.9. Equipment and System Support Projects

Yeryüzü Doktorları develops projects for the transfer, installation and administration processes of health units such as hospitals, health centres and laboratories and carries out long-term and permanent studies to improve the health systems and the services rendered in the areas in need.

# 2.4. NATIONAL AND INTERNATIONAL COLLABORATIONS

Yeryüzü Doktorları perform their projects in coordination with international organizations such as World Health Organization (WHO), United Nations International Children's Emergency Fund (UNICEF), United Nations High Commissioner for Refugees (UNHCR), United Nations Office for the Coordination of Humanitarian Affairs (UN OCHA) and in collaboration with local partners.

While Yeryüzü Doktorları perform their projects, it coordinates and makes collaborations with T.R. Ministry of Health, TİKA, AFAD and Turkish Red Crescent and conducts project based activities with national NGOs. In countries where it conducts its projects, it makes project based partnerships with local health authorities, local/international NGOs and universities.

### 3.1.1. Syrian Crisis

According to the United Nations High Commissioner for Refugees (UNCHR), there are 6.3 million internally displaced persons (IDP) in Syria. In the country where health service infrastructure has suffered greatly due to the civil war that started in March 2011, people who are forced to migrate are unable to access basic health services.

Since the very first day of the crisis, Yeryüzü Doktorları has been providing health services to people affected by this crisis with the support of donors and volunteers.

First, a Triage Centre has been established in the Wadi Khaled region on Syria-Lebanon border. A blood bank and a laboratory were established in Darül Shifa Hospital, which provided free services to Syrian refugees in Lebanon. Upon the reflection of the effects of the crisis to Turkey borders, surgical kits, first aid kits, medication, equipment, water purification tablets and hygiene kit supports were provided inside Syria; equipment and operational support was provided to a hospital within Syria's Yamadi region; and clinic service was provided in Azez region. A health station in Yayladağı has been established in Turkey towards refugees; emergency and mobile health services were provided in Suruç and primary health and psychological support services have been realized in Şırnak, Batman, Diyarbakır, İzmir and İstanbul.

Syria projects actualized in 2017 are as follows.

### Marmara-Aegean Refugee Health Project (MEMP)

Within the context of the fund support provided by European Commission Humanitarian Aid Office (ECHO) and with the collaboration of Doctors of the World (Médecins du Monde), primary health care and psychosocial support services were provided to the refugees in İzmir and İstanbul.

Examination, nursing, pregnancy follow-ups, family planning, vaccination, psychosocial support and medication provision services were provided through the clinics established in March 2016 in İstanbul/Sultangazi and in February 2016 in İzmir/Konak and with mobile health teams providing service in İzmir.

internal medicine, gynaecology, paediatrics, family medicine and general surgery branches. In the clinic, in addition to primary health service towards Syrian refugees, psychological support service has been provided either.

With the project, the idle facility has been used every evening and during weekends, an increase in service capacity has been provided, and thanks to the Syrian staff, language barrier has been overcome significantly.

er of ries 335 183 .100 .061

### Migrant Health Training Centres Project

Migrant Health Training Centres Project aiming to support health services provided to refugees by integrating Syrian health employees to Turkish health system, has been launched in January 2017 with the fellowship of T.R. Ministry of Health and World Health Organization. Within the scope of this project, case management, translation support, preventative health trainings and psychosocial support services are renders in migrant health training centres in İstanbul, Gaziantep and Şanlıurfa.

### Syria-Soran Maternal Health Clinic Project

In Syria, where the health service infrastructure has been severely damaged due to the civil war that has entered its seventh year, the basic health services are not provided sufficiently to the local people who are obliged to internal migration. In the regions that became safe in Syria, the population is constantly increasing with internal migrations. Yeryüzü Doktorları has established a clinic in one of these regions, Soran district of Azez province where the population has reached 130,000 which maternal and primary health services will be provided.

### 3.1.2. Central Africa Crisis - Chad- Sido Refugee Health Centre

According to United Nations data, 100,000 refugees who migrated to Chad because of the Central African crisis, which began near the end of 2013, began to settle in the camps formed in the south east of the country.

Within the scope of this project, firstly, Yeryüzü Doktorları started giving health services in Doyaba refugee camp in 2014, and has established a new health centre in Sido refugee camp located in Maro region of Chad hosting 50,000 refugees. This centre is the only place that provides free health services to the persons living in Sido refugee camp and region locals.

### 3.2.1. Voluntary Medical Teams (VMT)

According to World Health Organization (WHO) data, 3.5 billion people are experiencing difficulties accessing basic health services. The insufficiency of the number of health facilities and the number of health personnel in these facilities lies under this statistic. Again, according to the World Health Organization, in Africa, there are 2 doctors and 3 nurses/midwives for every 10,000 people. Along with that, in 13 low and middle-income countries, an average of even 1 hospital do not fall for 1 million population. As it can be understood from these data, access to health services, one of the most basic human rights, is one of the biggest problems for people living in such areas.

Doktorları, 27.7% were covered by funding institutions

and 8.3% by local partners.

### 3.2.2. Retinal Diseases Treatment Program

According to the World Health Organization (WHO) data, there are 285 million people with visual impairment in the world. Due to the inability to treat the visual impairments which 80% of them are preventable or treatable with appropriate methods, thousands of people lose their ability to see. 51% of these cases are the result of cataract cases that can be treated.

Since 2006, with the support of volunteer doctors and donors from Turkey and around the world Yeryüzü Doktorları organizes eye camps in Niger, Kenya, Lebanon, Somalia, Yemen, Mauritania, Tanzania, Congo, Sudan, Afghanistan, Chechnya, Pakistan and Uganda. In addition to the treatment services offered under the

Table 3.6. Retinal Diseases Treatment Program 2017 Results Table

TOTAL	4,403	29,816	12,196

program, the establishment of eye surgical units and the training of local health personnel, the local health capacity is being strengthened.

In 2017, medical camps in Afghanistan, Chechnya, Pakistan, Somalia and Sudan, 4,403 surgeries, 29,816 examinations were performed and 12,196 spectacles have been distributed.

### 3.2.3. Gaza Physiotherapy and Rehabilitation Program

Gaza Physiotherapy and Rehabilitation Program has been initiated due to the increase of persons that require physiotherapy and rehabilitation after 2014 Gaza crisis and the absence of infrastructure in this field. Within the scope of this program, equipment and operation support were provided to two physical therapy and rehabilitation centres providing service in North Gaza Region and Gaza City with limited facilities in 2014. In 2015, a new physiotherapy and rehabilitation centre was established in the Khan Yunis region in Southern Gaza.

### Table 3.7. Gaza Physiotherapy and Rehabilitation Program 2017 Results Table

•		<u>Physiotherapy/</u> <u>Rehabilitation Session</u>	Number of Patients Discharged	<u>Psychological</u> Support Session	
	Mobile Health Teams	10,182	226	1,036	
	Khan Yunis Physiotherapy and Rehabilitation Clinic	2,529	143	-	
	TOTAL	12,711	369	1,036	

In 2017, 12,711 physiotherapy/rehabilitation sessions and and 1,036 psychosocial support sessions have been performed with 5 mobile teams and Khan Yunis Physiotherapy and Rehabilitation Clinic in the cities of Gaza Strip (Refah, Khan Yunis, Central Region, Gaza City, Northern Gaza)

# 3.3. NUTRITION HEALTH PROJECTS

According to the statistics of the Food and Agriculture Organization of the United Nations (FAO), there are 815 million people in the world who are suffering from hunger. According to the report of World Health Organization (WHO), health issues due to nutrition constitutes 10% of the world's illness total. The group with the highest risk of hunger and nutritional disorders are mothers and children. According to the United Nations International Children's Emergency Fund (UNICEF), 155 million children are suffering from growth disorder due to insufficient nutrition, and 1.5 million children die each year.

Within the context of Nutrition Health projects, Yeryüzü Doktorları establishes nutrition health centres and/ or supports existing centres in areas where problem of hunger occur due to drought, poverty, internal disturbances and similar reasons. In these centres, with the collaboration of UNICEF and World Food Program (WFP), 3-6 months of nutritional programs are organized by providing therapeutic nutritional supplements to adults and children. In circumstances where therapeutic nutritional supplements are not provided, nutritional support is provided with rations, Qurbani meat etc.

### 3.3.1. Yemen Nutrition Health Centre

According to the United Nations Office for the Coordination of Humanitarian Affairs (UN OCHA), approximately 22.2 million people are in need of humanitarian aid and 17.8 million people are in need of food aid in Yemen with a population of 29.3 million.

In 2017, Yeryüzü Doktorları performed 7,945 examinations and 1,426 nutrition therapies in the nutrition health centres where it has established in 4 different regions of Aden City of Yemen; namely Al-Mimdara, Al-Bassten, Al-Mulla and Al-Shab.

### Table 3.8. Yemen Nutrition Health Centres Project 2017 Results Table

	<u>2016</u>	<u>2017</u>	
Nutrition Therapy	3,870	1,426	
Examined Person	17,030	7,945	

### 3.3.2. Syria Eastern Guta Nutrition Health Program

Nutritional disorders of women and children in the Guta region of Damascus, where has been under siege for five years and where more than 450,000 people live, is one of the biggest health issues. Within the scope of the project, throughout the nutrition health follow-up service, with doctor controls, according to age intervals, in accordance with the rules and standards set by World Health Organization, height, arm, weight measurements are performed and monthly food packages are supplied regularly.

In 2017, a total of 7,000 persons have been provided with nutrition health service where 2,500 persons per month constitutes 1,000 persons between 0-2 years of age, 1,000 between 2-5 years of age and 500 nursing mothers.

### 3.3.3. Food Aids

Within the scope of food aids in 2017, 1,500 food packages have been delivered to 9,500 persons in 3 countries.

### Table 3.9. Food Aids Project 2017 Results Table

	<u>Number of</u> <u>Packages</u>	<u>Number</u> Beneficiari
Afghanistan	400	2,40
Niger	600	3,60
Yemen	500	3,50
TOTAL	1,500	9,50

### 3.3.4. Qurbani Organizations

Within the scope of Qurbani organizations, a total of 14,693 shares of Qurbani where slaughtered in 7 countries and delivered to 587,720 persons.

### Table 3.10. Qurbani Organizations Project 2017 Results Table

Country	Number of Shares	
Afghanistan	714	
Chad	1,673	
Kenya	2,072	
Niger	7,280	
Somalia	2,254	
Uganda	350	
	350	
TOTAL	14,693	

# 3.4. PREVENTIVE HEALTHCARE PROJECTS

### 3.4.1. WASH Projects

According to the World Health Organization (WHO) data, 2 billion people have to use foul water as drinking water. According to the same report, 502,000 deaths occur every year due to diarrhoea disease caused by the use of foul water and inadequate sanitation. In 2025, it is estimated that half of the world's population will live in areas where access to water is limited.

In order to prevent the spread of infectious diseases caused by sanitation, in 2017, Yeryüzü Doktorları has opened 60 wells in Afghanistan, Chad and Somalia by opening water wells and improving infrastructures for the access to fresh water in regions where the drought is experienced and where infrastructure is inadequate and thus, 55,714 people were provided with access to fresh water. In addition, 672,000 water purification tablets were distributed in Yemen.

# 3.5. MEDICAL **TRAINING PROJECTS**

3.6. MEDICATION, **CONSUMABLES AND HYGIENE** MATERIAL **SUPPORT PROJECTS** 

According to the World Health Organization (WHO) data, there are 168 medical faculties in 47 sub-Saharan African countries. There are no medical faculties in 11 of these countries, and there is only one in 24 countries. The World Health Organization (WHO) predicts that if the necessary initiatives are not taken, by 2030, the number of health worker shortage will reach 18 million worldwide.

In the countries where Yeryüzü Doktorları implement Projects and Programs, it supports education, certification and specialization programs at associate's degree, undergraduate and postgraduate levels in order to increase health employee capacity and contributes scientific research and activities by organizing congresses.

### 3.5.1. Somali Medical Specialization Program

Somali Medical Specialization Program was launched in 2013 with the cooperation of Somali Benadir University. Students accepted in this program participate to the monitoring program in Turkey 2 months every year over 3 years. In the program where 79 specialist doctor candidate is registered in general surgery, internal medicine, gynaecology and paediatrics branches, 49

students participated in the observation program in Turkey, and 14 students have been graduated in total where 9 of them were graduated in general surgery branch in 2016 and 5 from general surgery and internal medicine in 2017.

### 3.5.2. Azerbaijan Paediatric Emergency Medicine and Intensive Care Trainings

Due to the need for training on basic-advanced life support, quality of care and follow-up and other emergency treatment approaches in emergency/trauma circumstances that threaten life in children in Azerbaijan, Yeryüzü Doktorları has developed and implemented a practical training programme in cooperation with Azerbaijan Ministry of Health and Paediatric Emergency Medicine and Intensive Care Association and the support of TİKA.

Within the scope of the program, a total of 38 people were trained in two centres in Sabran and Quba cities. However, four Azerbaijani doctors have also been brought to Turkey to receive instructor training.

According to the World Health Organization (WHO) data, in underdeveloped countries, 67% of health expenditures constitute spending on medication. In the majority of these countries, the most basic treatment purposed medications cannot be supplied, and even if supplied, there is a risk of them being counterfeit. It is stated that one out of every 10 medications in underdeveloped countries is counterfeit or low quality. However, in areas where infectious diseases constitute the majority of the illness total, provision of medication and consumables support in addition to hygiene materials plays an important/supplemental role for the efficiency of health services.

### 3.6.1. Medication and Consumables Support

Yeryüzü Doktorları is providing underdeveloped and developing countries with medications and medical supplies in line with their needs. Medications and medical supplies that are donated in kind or purchased with cash donations are sent to hospitals, clinics and

### Table 3.11. Medication and Consumables Support Project 2017 Results Table

maternal and nutrition health centres, especially in emergencies.

The total value of medication and medical material support realized in 2017 is 4,074,721.72 TRY.

**Total Medication and Consumables** Support (TRY) 891,069.29 1,098,049.16

### 3.6.2. Hygiene Kit Distribution

With three operations carried out in 2017, a total of 8,772 hygiene kits were distributed and 53,592 persons have been reached.

### Table 3.12. Hygiene Kit Distribution Project 2017 Results Table

<u>Number of</u> <u>Hygiene Kits</u> 5,000	Number of Beneficiaries 30,000	•

# 3.7. EQUIPMENT AND SYSTEM SUPPORT PROJECTS

According to the World Health Organization (WHO) data, in 13 low and middle-income countries, an average of 1 regional hospital falls for 1 million people. Existing services in health centres and hospitals in such countries often fail to provide adequate services due to lack of medical devices or the absence of medical devices at all. In Africa, for example, for 1 million persons; there are 0.31 computerized tomography (CT) devices, 0.21 positron emission tomography (PET) devices, and 0.42 magnetic resonance imaging (MRI) devices.

In order to be able to diagnose the patients and to apply correct treatment methods, provision of necessary devices and training to these centres is of great importance for supporting the health system in such countries and for the continuity of services in these health centres.

Within the scope of Equipment and System Support Projects, Yeryüzü Doktorları aims to provide equipment

and system support in necessary countries/regions, especially in crisis and emergency situations, and to support preventive and therapeutic health services.

### 3.7.1. Uganda Islamic University Gombe Regional Hospital Medical Equipment Support

Gombe Regional Hospital was established in 1969 to meet the health care needs of a basin where approximately 300,000 people reside. In the hospital, patients are often unable to be treated or face the risk of infection due to inadequate basic sanitary infrastructure, lack of current medical equipment or loss of functionality and sterilization problems.

In 2017, equipment and system support was provided by Yeryüzü Doktorları in order to support the health services and to improve the equipment/system infrastructure of Uganda Islamic University and Gombe Regional Hospital.

In the 4th Kocatepe Youth Fair, held by Turkey Religious Foundation Women, Family and Youth Centre (KAGEM), young people have gathered around "knowledge, science, skill" themes. Humanitarian aid activities were communicated to young people at the fair, where Yeryüzü Doktorları as well has participated.

# 13 May 2017 | Yeryüzü Doktorları participated in the BYV Career Festival

400 Boğaziçi University students and graduates and 28 leading institutions of our country have gathered in Sabancı Teacher's House under the 11th Career Festival organized by Boğaziçi Managers Foundation (BYV). Yeryüzü Doktorları communicated its activities and career opportunities to young people at the festival.

# 25 May - 1 June 2017 | "Goodness of the World" photo exhibition has been organized

Yeryüzü Doktorları has presented its photograph exhibition "Goodness of the World" to the public's taste in İstanbul and Bursa between 25 May - 1 June 2017 which included photographs from the Nutrition Campaign it has initiated in countries facing hunger risk due to drought, poverty and internal disturbances such as Somalia, Niger and Yemen.

# 26 May 2017 | Nutrition Campaign will be a hope for Africa and Middle East

Yeryüzü Doktorları has launched a nutrition health campaign without being unconcerned to the difficulties in the regions facing hunger risk due to drought, poverty and internal disturbances such as Somalia and Yemen. Yeryüzü Doktorları, who performs examinations free of charge in the nutrition health centres established since 2012 in these regions, and organizing special nutrition programs towards mothers and children who were diagnosed with severe nutritional disorders is planning to establish 2 more Nutrition Health Centres in 2017.

### 1-7 June 2017 | Yeryüzü Doktorları supports the Hunger Week with nutrition campaign

Hunger Week, which takes place every year between 1 - 7 June, once again revealed the fact that the world is facing the biggest humanitarian crisis of the last 70 years. Yeryüzü Doktorları have supported the Hunger Week with the nutrition campaign launched in regions such as Somalia, Niger, and Yemen that are under hunger risk due to drought, poverty and internal disturbances.

## 14 June 2017 | Yeryüzü Doktorları supports the fight against cholera outbreak in Yemen

The increase in the number of people lost their lives in the cholera outbreak in Yemen, made Yeryüzü Doktorları take action against the cholera outbreak. Yeryüzü Doktorları have provided hygiene kit, water purification tablet and medication support in Yemen, where about 3 million people are at risk of being stricken with cholera due to the inability to find fresh drinking water and to collect the wastes.

### 16 June 2017 | Yeryüzü Doktorları family came together at a fast-breaking dinner

With the participation of young volunteers from various universities in Turkey, employees and management of Yeryüzü Doktorları, a fast-breaking dinner has been organized in a boat. Young Yeryüzü Doctors from various universities have participated in the fast-breaking dinner where speeches on volunteerism were made.

### 20 - 21 July 2017 | Yeryüzü Doktorları stands beside Africa for 17 years

Yeryüzü Doktorları took part in the Health in Africa Congress, an event based on the development of academic, social and cultural relations, focused on solutions to health problems in Africa. Yeryüzü Doktorları, operating in nearly 50 countries for 17 years, communicated their experiences at the congress held at the WOW Convention Centre between July 20 - 21.

### 24 - 28 August 2017 | Young Yeryüzü Doktorları gathered for the camp, "Youth for Goodness"

An approximately 120-person team of volunteer college students studying in various provinces of Turkey and the management team and employees of Yeryüzü Doktorları have gathered in "Youth for Goodness" camp. Experiences on humanitarian aid were communicated to young persons in the camp organized in Balıkesir, workshops and social activities were carried out as well.

### 28 August 2017 | Yeryüzü Doktorları says "Let there be Qurbani, let there be Health" in this Feast of Qurbani as well

Yeryüzü Doktorları continued its Qurbani slaughter organizations this year as well. While in developed countries, annual meat consumption is around 120 kilos per person, however, in poor and economically underdeveloped countries this figure can be under 20 kilos. In order not to be unconcerned to this situation, Yeryüzü Doktorları has held Qurbani organizations under the name "Let there be Qurbani, let there be Health" in countries which are far beyond the borders of our country but well below the hunger limit.

### 2-4 October 2017 | In the Future Medicine event, Yeryüzü Doktorları communicated their activities to visitors

In the 3rd Future Medicine event which is held by TOBB Economics and Technology University Health and Biomedical Sciences Community between 2 - 4 October, aiming to review the present, past and future of health, Yeryüzü Doktorları has communicated its experiences on health to the visitors.

# 23 October 2017 | Yeryüzü Doktorları were in Somalia for immediate intervention following the explosion

The bombed attack, which resulted in the death of 358 and injuries of around a thousand people on 14 October in Somalia, was one of the heaviest attacks in recent history of Somalia. Yeryüzü Doktorları has also attended to the military ambulance aircraft heading out in order to bring the badly wounded people to Turkey organized by the coordination between AFAD and the Ministry of Health. Within the direction of a request from the Recep Tayyip Erdoğan Hospital in Somalia, the team which voluntary doctors in the fields of plastic surgery and general surgery from Yeryüzü Doktorları have also participated quickly reached Somalia after the explosion and treated the wounded in the explosion in Somalia.

# 27-29 October 2017 | Yeryüzü Doktorları opened a booth in the Greatist İstanbul Congress

In the Greatist Congress held in Grand Cevahir Congress Centre between 27 - 29 October in order to make Istanbul one of the dental meeting points of the world, Yeryüzü Doktorları has also participated with the booth it has opened.

# 30 October 2017 | Yeryüzü Doktorları have gathered with volunteer pharmacists for Eastern Guta

In Syria's Eastern Guta region where hundreds of people have lost their lives due to lack of food and medications, Yeryüzü Doktorları have been running a regular nutrition program for a year. Yeryüzü Doktorları have come together with volunteer pharmacists in order to attract attention towards the shortages experienced in the region, especially in the last few days, and to increase food and medication aid to the region.

# 12 November 2017 | Yeryüzü Doktorları has participated to the 39th İstanbul Marathon.

Young Yeryüzü Doktorları communities from 8 universities in İstanbul and nearby provinces ran in the 39th İstanbul Marathon in order to attract attention for goodness and need in all parts of the world.

# 14 November 2017 | Cholera outbreak and hunger issues continue in Yemen

According to the information obtained from World Health Organization, the cholera outbreak in Yemen threatens the public. It is reported that 2 thousand 100 people lost their lives because of cholera this year alone. Restrictions on the entry of food, fuel and medication to the country still continue. In May 2016, Yeryüzü Doktorları, who has established nutrition health centres in 4 different regions in Aden province of Yemen and providing treatment within the scope of fighting hunger, has provided hygiene kits, water purification tablets and medications to the region due to increasing cholera outbreak.

### 16 November 2017 | Joint Project between the Yeryüzü Doktorları and Russian Federation on the Republic of Chechnya

Yeryüzü Doktorları has sent a Voluntary Medical Team consisting of 3 retinal diseases specialists, 2 internal medicine specialists, one general medicine doctor and one retinal diseases nurse to the Grozni and Gudermes region of Chechnya between 29 October - 4 November. Yeryüzü Doktorları Voluntary Medical Team has carried out 571 examinations and 67 surgeries by conducting joint studies with the Chechnya health team.

### 29 November - 2 December 2017 | Yeryüzü Doktorları has also participated in İstanbul Health Expo

İstanbul Health Expo held at CNR Expo Yeşilköy between 29 November - 2 December 2017 in order to provide added value to the health industry and our country's economy, have gathered all components of the country health industry. In the exhibition where health authorities of public institutions also participated, Yeryüzü Doktorları has communicated its activities on the field of health to the visitors.

According to the World Health Organization data, more than 1.9 million people in Chad are having difficulty accessing basic health services. While malaria is the main cause of death for children under five years of age; last year, a thousand people have lost their lives due to malaria. Yeryüzü Doktorları have supported refugees who took refuge in Chad since the early days of the crisis. Until today, 15 thousand people have been given health services and it is aimed to provide 5 thousand more persons with health services until the end of this year. Yeryüzü Doktorları are also trying to apply treatments where local facilities are inadequate by sending Voluntary Medical Teams from time to time to the region as well as the clinical services it provides.

### 9-10 December 2017 | Yeryüzü Doktorları participated in NGO Fair held by UNIW

"International NGO Fair" that gathers international non-governmental organizations was held with the collaboration of the Union of Islamic World NGOs (UNIW) and Foundation of Voluntary Establishments in Turkey (TGTV), with the support of İstanbul Metropolitan Municipality between 9 - 10 December 2017 in İstanbul Yenikapi Eurasia Event and Arts Centre. Yeryüzü Doktorları has participated to the fair with the booth it has opened and has shared the brochures, booklets etc. documents prepared in Turkish, Arabic and English along with media consisting of visual and audible instruments with other participants as well as fair visitors. In addition, among the panels organized within the scope of the fair, Ali Doğan's presentation titled "Resource Development in Civil Society" also took place.

# 25 December 2017 | Yeryüzü Doktorları launches campaign "Life is Better Saving"

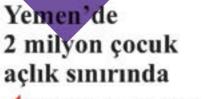

Realizing hundreds of projects in more than 40 countries by reaching out to people in need who are unable to access health services in order to make them hold on to life, Yeryüzü Doktorları has launched the "Life is Better Saving" campaign in order to touch more lives in geographies such as Eastern Guta, Somalia, Yemen where we get bad news everyday.

# rınca Güzel' fotoğraf sergisi

Yemen'de 2 milyon çocuk

Yemen'de 2015 Mart ayında başlayan ve iki yıldır devam eden iç savaş nedeniyle 27 milyon nüfuslu ülkenin yarısından fazlası, temel gıda maddelerine ulaşmakta sıkıntı yaşıyor. Devam eden çatışmalar nedeniyle sağlık sisteminin kritik eşikte olduğu ve uluslararası yardımların yeterince bölge halkına ulaşmaması nedeniyle her 10 dakikada bir çocuğun açlığın sebep olduğu hastalıklardan öldüğü belirtildi. 2,1 milyonu çocuk olmak üzere toplam 14 milyon kişinin temel gida malzemelerine ulașamadığını belirten Yeryüzü Doktorları Genel Müdürü Ali Doğan, "Yaşanan insani krize bir an önce müdahale edilmesi gerekiyor. Yardım TIR'ları bölgeye ulaşmadığı her dakika çocuklar hayatını kaybetmeye devam edecektir. Bu krize bir an önce çözüm üretilmeli ve acil olarak Yemen'e insani vardım gönderilmelidir" dedi. İç savaşın başladığı 2015 yılından bu vana yaklasık bin 400 cocuğun öldüğünü ve 2 bin 400'den fazla çocuğun da yaralandığını söyleyen Doğan, "Yaşanan çocuk ölümleri gıda yetersizliğiyle birlikte artmaya başladı. Can kayıplarını engellemek için 2016 Mayıs ayında Aden şehrinin Al-Sheikh, Dar Sad, Al-Mulla, Al-Borika bölgelerinde, 4 beslenme sağlığı merkezi açtık" diye konuştu.

### Yeryüzű Doktorları, Uganda'ya hareket etti

zenli olatak Afrika faaliyetlerihedeflediklerini ifade ederek, "On- ne devam ediyoruz. Birçok gönülrimiz var." dedi.

Uganda ile yıllardan beri çalış tıklarını dile getiren Güney, bu ülkedeki sivil toplum kuruluşlarıyla beraber sağlık yardımlarına ve çeşitli hizmetlere katıldıklarını belintti. Güney, bölgedeki tıp fakültelerini de desteklediklerini kaydederek, söyle devam etti:

"Icerisinde kadın doğum, genel cerrahi ve anestezi uzmanlarinm, mesleginde başarılı arkadaşımizin olduğu bir gönültü grubuyla yaklaşık 10 gün kamp yapacağız. Insallah cok faydah olacak. Oradan da büyük bir umutla ve hasretle bizi bekliyorlar. Zannediyorum 600 civarında bir muayene ve 40 ila 60 arasi operasyon helefliyoniz Birtakım hazarlıklar y Ancal takdir edersiniz ki çok kolay değil."
